TURKISH SOAP

S I N C E 1 9 2 3

We set out with the inspiration we received from the healing resources created by nature...

In this story, which has been written from 1923 to the present, from generation to generation; We have always taken care to follow the footsteps of nature and its values.

Today, Mrs. Ebru, the 3rd generation granddaughter of Aunt Ayse from Mora, who made the first touch to this precious story, continues to develop and apply the same formula.

JOURNEY IN THE LIGHT OF TRADITIONAL VALUES

We continue our production, which starts with a spoonful of olive oil and is shaped by patient hands, all with traditional techniques that give us this unique naturalness.

The same wooden molds, the same care, the same patience and that magical recipe that has been preserved from generation to generation.

LOOKING AT LIFE THROUGH NATURE'S EYES

Nature, which inspired our journey, presented the fertile healing resources of the Aegean and Mediterranean, home to ancient civilizations, to us as a gift.

And by blending our experience with a wide range of products, we turn them into natural soaps that do not contain any additives. Just like Aunt Ayse from Mora did years ago...

Throughout this journey, we have transformed the Turkish Soap brand into a traditional value inspired by the call of cleanliness and purity... And we have patiently grown the bathroom culture of Anatolian civilizations by passing them through the source of cleanliness and purity.

Because, as we always believe, every hand that passes #Fromthehandsofnature and all the beauties in its heart definitely have a meaning.

As Turkish Soap, we continue to carry on this great legacy we have inherited from nature with love and effort...
